

AMERICAN GOVERNMENT IN THE 21ST CENTURY

2023 EDITION

***SPONSORED BY GEORGE WASHINGTON UNIVERSITY
AND THE SOCIETY OF PRESIDENTIAL POLLSTERS***

PRESENTED BY MARK J. PENN

SURVEY METHODOLOGY

This survey was conducted online within the United States from **September 8 – 11, 2023** among **2,001 registered voters** by **HarrisX**.

The margin of error is **+/- 2.2 percentage points**.

Results were weighted for age, gender, region, race/ethnicity, income, education, political party, and political ideology where necessary to align them with their actual proportions in the population.

KEY FINDINGS

After several years of stagnation, confidence in the Presidency, Supreme Court, and Congress has dropped.

Concerns over presidential authority and improper use of executive power have increased under the Biden Administration.

Voters are passionate about free speech and want the government to strengthen this First Amendment right instead of cracking down on misinformation and implementing restrictions.

Most voters say that institutions are increasingly becoming politicized and that our nation's leaders prioritize party loyalty over the national interest.

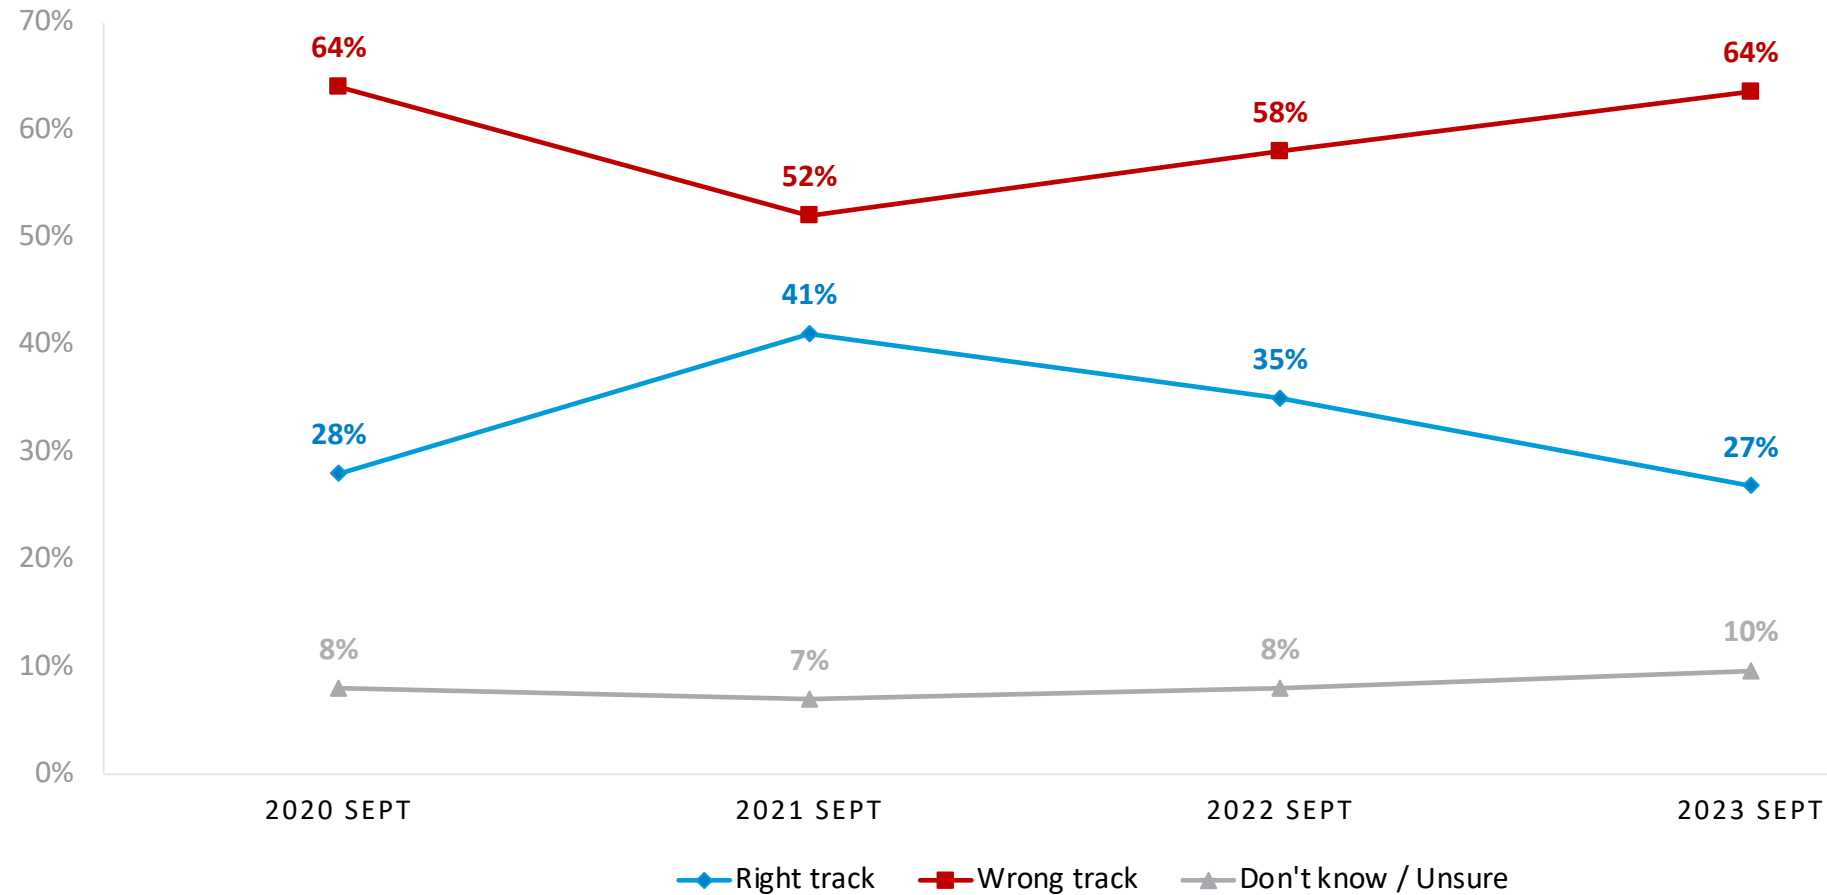

The breakdown of bipartisanship in the U.S. political system is intensifying, and voters believe drawing the best ideas from both parties is critical to restoring balance.
